RESEARCH INTERESTS Advanced nuclear reactors, multi-physics simulation, nuclear fuel cycle analysis, scientific computation, high performance computing

PHD **University of Illinois at Urbana-Champaign, NUCLEAR ENGINEERING Jan 2020 - Dec 2022**

- Thesis: Fluoride-Salt-Cooled High Temperature Reactor Generative Design Optimization with Evolutionary Algorithms
- Advisors: Dr. Kathryn D. Huff and Dr. Madicken Munk
- Graduate Concentration in Computational Science and Engineering

MS **University of Illinois at Urbana-Champaign, NUCLEAR ENGINEERING Aug 2017 - Dec 2019**

- Thesis: Sensitivity Analysis of Nuclear Fuel Cycle Transitions
- Advisor: Dr. Kathryn D. Huff

BASc **Queen's University at Kingston, Canada, ENGINEERING PHYSICS Sept 2013 – May 2017**

- Thesis: Designing a System to Gaseous Hydrogen Charge Zirconium Alloys
- Concentration in Material Science

RESEARCH EXPERIENCE **University of Illinois at Urbana-Champaign, Urbana, IL Aug 2017 – Dec 2022**
Graduate Research Assistant, Nuclear Plasma and Radiological Engineering

- Leveraged artificial intelligence genetic algorithms to optimize fluoride salt-cooled reactor geometry using Python package DEAP, and open-source OpenMC and Moltres tools
- Collaborated with 14 scientists to benchmark the Fluoride-salt High-temperature Reactor by modeling the design in OpenMC
- Led analysis, code and test development of the "Demand-Driven CYCAMORE Archetypes" NEUP project to construct demand-driven deployment algorithms and time series models in Python and C++ open-source tools, d3pjoy and CYCLUS

Argonne National Laboratory, Lemont, IL June 2020 - Aug 2020
Research Aide, Advanced Nuclear Energy Systems Group

- Implemented variable salt-feed functionality and tests in ANL's NQA-1 certified Reactor Fuel Management and Depletion Python tool, ADDER
- Conducted a code verification of ADDER's MSR depletion capability against published results from SCALE

Argonne National Laboratory, Lemont, IL May 2019 - Aug 2019
Research Aide, Reactor Physics and Fuel Cycle Analysis Group

- Investigated fuel cycle sensitivity analysis and optimization methods for the Department of Energy's Nuclear Fuel Cycle Options Campaign by coupling ANL's fuel cycle simulator, Dymond, with Sandia National Lab's optimization and uncertainty quantification tool, Dakota, using Python

Queen's University at Kingston, Canada, Kingston, ON Sept 2016 - May 2017
Research Assistant, Nuclear Materials Research Group

- Designed a Sieverts Apparatus to gaseously charge hydrogen gas into zirconium alloys to mimic hydrogen embrittlement of zirconium alloys used in nuclear reactors.

National University of Singapore, Singapore May 2016 - Aug 2016
Research Assistant, Centre for Advanced 2D Materials

- Developed a MATLAB script to study the effect of Berry Curvature on electrons in graphene and the effects of changing the geometry of graphene devices on their electric fields.

Nanyang Technological University, Singapore May 2015 - Aug 2015
Research Assistant, Polymeric Biomaterials Group

- Conducted experiments to characterize nanoparticle enhanced polymer materials

INDUSTRY EXPERIENCE	Meta, Menlo Park, CA PhD Software Engineer Intern (ML Track), FB Creators Wellbeing Team	May 2021 - Aug 2021
	<ul style="list-style-type: none"> Implemented a viewer-personalized ML model in Facebook's comment ranking infrastructure resulting in 1% increase in user-engagement Constructed an end-to-end ML pipeline: dataset generation with DataSwarm, Gradient-boosting decision tree classifier training with PyTorch, A/B testing with online performance monitoring, and backend infrastructure support with Hack 	
HONORS AND AWARDS	Women in Nuclear Chapter Excellence Award Queen's University Dean Scholar Queen's University Principal's Entrance Scholarship	2019 2014-2017 2013
